## PRESS RELEASE

DATE: Thursday, April 28, 2022

### Little Miami Scenic Trail to Close

Lebanon, Ohio – City of South Lebanon and Hamilton Township, Warren County, Ohio – The Little Miami Scenic Trail, approximately 1,000 ft in each direction of the Grandin Road intersection, will be closed to bike traffic and pedestrians beginning Monday, May 9<sup>th</sup>, 2022, for the duration of the 2022 construction season in connection with the King Avenue Bridge Replacement Improvements Project. The trail closure is needed to allow for safe construction of the new King Avenue bridge over the Little Miami River, the bridge carrying Grandin Road over the trail, new trail parking lot, and the trail relocation. If there are safe opportunities to temporarily reopen the trail at times during this period, access maybe provided with the use of gravel and temporary fencing, this temporary access would only be for pedestrians or walking with a bike through the construction zone. Access from the trail to the Peter's Cartridge Factory and to Cartridge Brewing will be maintained at all times from the southwest.

The trail closure will have advance warning signs for the bikers and pedestrians placed at the nearest trailhead locations.

The Warren County Engineer's Office understands that the closure of the trail at this location is an inconvenience to the public, however it is necessary to safely construct the project improvements. Your cooperation during this project is greatly appreciated.

For more information, visit <http://www.wceo.us> or contact WCEO at (513) 695-3301. Please continue to check our website for project updates.

### About the Warren County Engineer

*County Engineers in Ohio are required by law to be registered as both Professional Engineers (P.E.) and Professional Surveyors (P.S.) They are responsible for the maintenance and construction of county roads and maintenance and construction of bridges on county roads, township roads, and certain streets within municipalities. They are also responsible for maintaining land surveying records, checking the accuracy and adequacy of recorded land transfer documents, and establishing or re-establishing certain land survey monuments.*
