PRESS RELEASE

DATE: Thursday, December 28, 2023

King Avenue and Grandin Road Now Open to Traffic

Lebanon, Ohio – Deerfield/Hamilton Townships and City of South Lebanon, Warren County, Ohio – King Avenue and Grandin Road, between Miami Street and Striker Road are now open to through traffic. Construction of the \$22,000,000 King Avenue Bridge Project is now complete. The new two span bridge has a total length of 520 feet and carries two wider lanes of traffic and a shared-use path for pedestrians and bicyclists across the Little Miami State and National Scenic River. A new precast arch bridge, adjacent to the river bridge, now spans over the Little Miami Scenic Trail, eliminating the previous dangerous at-grade road and trail crossing. The shared-use path on the bridge and the Little Miami Scenic Trail are now open as well. Other improvements associated with the project include a new parking lot for the trail, roundabout at the intersection of the trail parking lot and the Peters Cartridge Factory development, and improved geometry of roadway approaches to the bridge.

The new bridge and roadway is now open to traffic, however flagging operations are expected during the daytime hours of 9:00 am to 3:00 pm, as needed to complete punch list items over the winter and into spring of 2024.

The bridge and roadway project was constructed by the Eagle Bridge Co. of Sidney, Ohio. Stantec Consulting Services designed the project out of their Cincinnati office and Prime AE Group, out of their Cincinnati office, performed construction inspection for the project.

A special thanks to everyone involved with the project from the beginning of design to final construction. The cooperation of the general traveling public, the Peters Cartridge Factory Apartments, and Cartridge Brewing during the construction of this two year project was greatly appreciated.

About the Warren County Engineer

County Engineers in Ohio are required by law to be registered as both Professional Engineers (P.E.) and Professional Surveyors (P.S.) They are responsible for the maintenance and construction of county roads and maintenance and construction of bridges on county roads, township roads, and certain streets within municipalities. They are also responsible for maintaining land surveying records, checking the accuracy and adequacy of recorded land transfer documents, and establishing or re-establishing certain land survey monuments.
